🌐 Seif Mongy

SUMMARY

AI Automation Engineer specializing in designing and building **AI-powered automation systems** that streamline **business processes**, reduce manual work, and automate **end-to-end workflows**. Experienced in developing intelligent workflows **using n8n, AI Agents, LLMs, RAG, REST APIs, webhooks**, and tool calling, with integrations across **AI platforms, vector databases, business APIs**, and communication services. Strong foundation in **Python, JavaScript, and SQL**, with hands-on experience in workflow orchestration, API integration, data retrieval, and **AI-driven business process automation**.

CORE SKILLS

Automation & Orchestration: n8n, Workflow Automation, Business Process Automation, UiPath, Power Automate, Webhooks, Event-Driven Workflows.

AI & LLMs: Azure OpenAI, LLM Integration, AI Agents, RAG, Prompt Engineering, Structured Outputs, LLM Classification, Tool/Function Calling, Human-in-the-Loop.

Programming: Python, JavaScript, Node.js, SQL, Shell Scripting, JSON Schema.

APIs & Integrations: REST APIs, OAuth 2.0, WhatsApp Business API, Instagram Graph API, LinkedIn API, Gmail / Google Workspace, Apify.

Databases & Cloud: Supabase, Vector Databases, Google Cloud, VPS / Self-Hosting.

Reliability & Engineering: Documentation, Error Handling, Retry Logic, Rate Limiting, Data Validation, Deduplication, Idempotency, Monitoring, Structured Logging.

PROFESSIONAL EXPERIENCE

Industrial Automation Engineer — Fresh Farm Group (Egypt)

2025 — 2026

- Managed industrial communication networks and device connectivity across production systems, using TCP/IP and industrial protocols to maintain stable, reliable data exchange.
- Configured and integrated networked automation devices, including PLCs and temperature controllers, enabling seamless real-time data flow between control systems and field devices.
- Diagnosed and resolved connectivity issues between control systems and field devices, minimizing downtime and maintaining continuous operations.
- Monitored network performance and conducted regular communication testing to ensure reliable system integration.

KEY PROJECTS

AI Clinic Customer Support & Appointment Management · n8n · AI Agents · OpenRouter · RAG · PostgreSQL · WhatsApp Business API
clinic automation system → customer support → doctor/service inquiries → appointment booking → rescheduling/cancellation → human handoff. Uses RAG + database-backed tools for clinic knowledge and appointment operations, with double-booking prevention, conversation context retention, automated daily summaries, and error alerts.

AI Restaurant Customer Support & Order Management · n8n · AI Agents · OpenRouter · RAG · Google Sheets · Telegram Bot API
Telegram customer support + order management → menu inquiries → table booking → order creation/modification/cancellation → status tracking → kitchen updates → customer notifications, with RAG, tool calling, input validation, and human handoff.

AI-Powered Multi-Industry Assessment & Evaluation System · n8n · Tally · PostgreSQL · AI Agents · OpenAI · Anthropic · Qwen ·
Multi-industry assessment system → industry-specific questions → common questions → hybrid scoring → multi-model AI evaluation → final assessment. Uses PostgreSQL for submission storage and duplicate detection, deterministic + LLM-based scoring, structured outputs, automated score calculation, and email delivery.

EDUCATION

B.Sc. Mechatronics Engineering — Benha University, Egypt · 2025

- GPA: 82% (Very Good with Honors)
- Rank: 7th in class

VOLUNTEERING

Volunteer — Life Makers Foundation (Egypt)

2025 – Present

- Contributed to community initiatives including healthcare support, clothing distribution, and Ramadan food package distribution.
- Participated in fundraising activities supporting underprivileged families and urgent medical cases.
